ABOUT

I am a UI/UX and Graphic Designer with 4 years of experience in branding, digital design, and visual storytelling. My work focuses on creating clean, modern, and user-centered designs that combine creativity with functionality across web, mobile, and social media platforms.

Started my journey in design with graphic design, where I learned visual fundamentals and branding. Over time, I expanded into UI/UX design, working on web and mobile interfaces, user flows, and improving user experience through practical projects. Later, I explored AI tools to speed up and enhance my creative process, and then moved into video editing to create more engaging digital content. This journey helped me build a strong mix of design, UI/UX, and multimedia skills with a focus on modern, impactful visuals.

WORK EXPERIENCE

Senior Designer

Hello World Technologies: [Website](#)

- Designed brand systems (logos, color palettes, typography, mockups) for brands.
- Built and optimized Shopify & WordPress stores with product pages, UX improvements, and CRO recommendations. Created high-converting ad creatives for Instagram, Facebook, and TikTok.
